TECHNOLOGIES LLC

THE VASER DIFFERENCE

A major advance in the application of ultrasonic technology to cosmetic procedures This system is specifically designed to preserve as much of the tissue matrix as possible, yet still remove the desired amount of fatty tissue.

HENRY SCHEIN REPRESENTATIVE

ADDING LASER TO LIPOLYSIS

ACCENT'980

Alma Lasers"

Patients today are asking for laser-assisted lipolysis, or "laser lipo": a highly effective, minimally invasive procedure that permanently eliminates fat cells with reduced downtime compared to traditional liposuction.

Accent 980 is FDA approved for laser-assisted lipolysis, using the ideal wavelength for minimally invasive performance.

- Procedure is done under local anesthetic
- · Safely and easily destroys fat cells.
- Provides simultaneous collagen stimulation for skin tightening and contouring, which reduces the need for a tuck or lift.
- Faster, easier and less traumatic aspiration process
- Less downtime and bruising for quick patient recovery: up and around in 24 to 48 hours.
- Produces high revenue and fuels demand for other laser procedures.

FAT GRAFTING: TISSU-TRAN

- Sterile, closed, non traumatic collection and filter of lipocytes.
- No centrifuge or large investment.

Henry Schein Item#	Volume	For All Volume Procedures:
235-0076	500cc	• Eyelids • Lip
235-0075	1000cc	 Hands Face Body Contouring
