

2023 RECYCLING EFFORTS

15,149
METRIC TONS

Total waste generated by our DCs

56
METRIC TONS

DC hazardous waste sent to landfill
(working to eliminate this)

11,217
(74%)
METRIC TONS

Material recycled at our DCs globally
(approximately 90% of all recycled material is typically from wood pallets and corrugated packaging every year)

18,000
POUNDS

Batteries recycled every four years when we replace our UPS battery modules

3,416
METRIC TONS

DC waste sent to landfill
(working to reduce this progressively)

540
POUNDS

Recycled fluorescent light bulbs *(by 2024 all our lightbulbs will have been replaced by LEDs)*

516
POUNDS

DC waste incinerated

\$8M+
DONATED PRODUCT
& THOUSANDS OF
TONS REMOVED
FROM LANDFILLS

Over \$8M worth of product donated to over 100 global medical and dental non-governmental organizations with thousands of tons of product with superficially damaged packaging kept out of landfills in 2023
