

A Powerful New Anti-Microbial That Protects Against MRSA/ Bacteria

Advantages

- SilvrSTAT is a **NEW** type of silver that immediately and continuously kills harmful bacteria
- **It is the only multivalent silver FDA indicated to inhibit MRSA**
- **NOT** an ionic silver and **NOT** deactivated by saline irrigation
- It **DOES NOT** create bacterial resistance like traditional antibiotics
- Transparent, water based - no alcohol, alginate or sulfa
- No known adverse events or allergies
- Cost competitive with other silver products
- Can be used as House Stock with huge cost savings

Indications: Pressure/Stasis /Diabetic Ulcers, Surgical Incision Sites, Device Insertion Sites, Graft / Donor Sites, 1st -2nd Degree Burns, Lacerations, Abrasions, and Skin Tears

1oz. size!**

Directions for Use

- **Apply SilvrSTAT** directly to the wound (cut, burn, abrasion, skin tear, ulcer, and incision site,) 1/8” thick and cover with a conventional dressing if necessary. Apply daily or up to every 3 days until the wound is healed.
- Store SilvrSTAT at room temperature up to 3 years

MRSA

- MRSA (Methicillin-resistant Staphylococcus Aureus) is one of the most important healthcare issues today
- SilvrSTAT is the only multivalent silver FDA indicated to inhibit MRSA
- **SilvrSTAT can be used to prevent and treat MRSA infections of the skin**
- SilvrSTAT kills MRSA bacteria quickly and effectively

Consider SilvrSTAT if you are using the following products

- | | |
|---|---|
| <ul style="list-style-type: none"> • Silvadene® (silver sulfadiazine) • SilvaSorb® • SilverMed® and Amerigel® • Gentell’s Silver Hydrogel Ag® | <ul style="list-style-type: none"> • Elta’s SilverGel™ Advanced Silver • DermaSyn® /Ag Antimicrobial Silver • any Hydrogel • Bactroban® (mupirocin) |
|---|---|

REIMBURSEMENT INFORMATION

- SilvrSTAT is reimbursable under **HCPCS Code A6248**
 - If you follow the billing guidance, the physician can send a patient home with a 3 ounce tube of SilvrSTAT and not only cover the cost of the product, but generate about \$20 in income
- Submit on the standard HCFA 1500 form
 - Physician must first complete a procedure that breaks the skin (e.g. Wart removal, punch biopsy, cautery, wound debridement, etc.)
- Open a new tube of SilvrSTAT and apply -- Give patient this tube for **home use**
- Use an “A” modifier to identify the number of wounds (e.g. A1 is one wound, A2, is two, etc.)
 - Use Place of Service (POS) #12 (home) Do **NOT** use POS #11 (office)

Visit the **Billing Code** section of www.henryschein.com/silvrstat for more information
