

SCAR THERAPY THAT DELIVERS

CLINICALLY PROVEN BETTER AT TREATING SCARS THAN MEDERMA® AND CICA-CARE™

CLINICALLY-PROVEN SCAR THERAPY

Cost-Effective Gel-Care® Advanced Sheets and Wraps Can Improve the Appearance of Hypertrophic and Keloid Scars.

Being occlusive is easy... but traditional silicone sheets are unable to deliver ingredients the way Gel-Care® Advanced does. ONLY Gel-Care® Advanced

patent-pending silicone-free technology incorporates an occlusive therapy with the vitamin, antioxidant, and hydration combined in a single effective and easy-to-use sheet that is washable and reusable. The clinically-proven ingredients continue to treat the skin even after the sheet is removed.

Gel-Care® Advanced treats scars caused by:

- ✓ injury
- ✓ burns
- ✓ surgery
- ✓ post-procedural
